

Articulating Poles

Zistos® mechanically articulating poles are rugged, lightweight, portable poles, which accept any Zistos camera and connects to any Zistos display.

FEATURES

- 6 models available in sizes ranging from 3ft to 20ft
- 180° ($\pm 90^\circ$) of camera head articulation via twist grip
- Mechanical cable design for maximum reliability
- Position indicator and mechanical detents offer camera angle feedback
- 90° camera rotation allows for either vertical or horizontal panning
- Quick disconnect from WalkAbout® or other display
- Submersible and waterproof
- All poles have 10ft coil cords (2ft coiled)
- Compatible with all Zistos cameras and displays through **VisionFlex®** modularity
